

BLACK LABEL SERIES

# MELATONIN

IT'S TIME TO PUT YOUR TROUBLE SLEEPING TO REST WITH CHOSEN VITAMINS BLACK LABEL SERIES MELATONIN.

## PRODUCT OVERVIEW

Are you having trouble getting a good night of solid, deep sleep? Is the stress of travel or long hours of work throwing your sleep cycles out of whack? The answer of your dreams may be Melatonin, a naturally occurring hormone that regulates your body's sleep cycle. Adding Melatonin to your diet improves REM "deep sleep" times and vivid dreaming, leaving your mind and your body well rested when you wake. Also, a powerful antioxidant, Melatonin is an ideal solution for people suffering from jet lag, long shift-work schedules, anxiety, and insomnia. It's time to start getting a solid night of sleep every night.

## HOW DOES IT WORK?

Melatonin is a natural chemical produced by the body to regulate sleep-wake cycles. Its production increases when the body is exposed to darkness, which causes drowsiness and a yearning for sleep. Exposure to light decrease melatonin production and essentially "wakens" the body. Low levels of melatonin are commonly associated with insomnia, shortened REM sleeps cycles, and restlessness.

## OUR CERTIFICATIONS

Chosen Vitamins goes to great lengths to ensure that every supplement that leaves our FDA-registered facilities is the best product available. Our NSF Good Manufacturing Practice (GMP) certification proves the fact that we are committed to meticulously testing our products to maintain consistent quality so our customers get the best products - one bottle at a time.

### GMP CERTIFIED

Every product that leaves our facilities holds up to Good Manufacturing Practice guidelines that ensure top-notch quality. These guidelines promote consistent production processes that make sure every bottle is as equally potent as it is powerful.

### FDA REGISTERED FACILITY

All of our products and facilities are held to the highest standards and operate in full compliance of FDA rules and regulations. We are proud to say that our top-quality vitamins are produced in FDA-registered facilities, where they exceed all the limits of testing and inspection.
