

BLACK LABEL SERIES

DHEA

TURN BACK THE CLOCK ON AGING, STAY MENTALLY SHARP, AND BOOST YOUR LIBIDO WITH CHOSEN VITAMINS BLACK LABEL SERIES DHEA SUPPLEMENTS.

PRODUCT OVERVIEW

Just because you act your age doesn't mean you have to look the part. The secret to slowing and even reversing the aging process is DHEA, a naturally produced hormone in your body. Unfortunately, DHEA levels in your body start to drop after the age of 30, which rapidly accelerates the process of aging. The problem is DHEA can't be found in any natural foods, but Chosen Vitamins Platinum Series supplements are an ideal solution that reverses the effects of aging by improving skin condition, enhancing cognitive ability, and keeping you stimulated in the bedroom.

HOW DOES IT WORK?

DHEA is a natural hormone produced by adrenal glands near the kidneys and in the liver. Once ingested by the body is converted to a hormone called androstenedione, which is then changed into major male and female hormones, such as testosterone and estrogen.

DHEA levels drop as you age, predominantly after the age of 30. DHEA levels also seem to be lower in people with certain conditions like depression. Low DHEA levels allow symptoms to arise, such as low energy levels, weak immune system, and even lack of sexual prowess. Replacing DHEA in your system is recommended for slowing effects of aging, increasing your energy levels, and replenishing your sex drive.
